

**NEW COLLECTION**

**BOXER / TRUNKS**

### BOXER POLYESTER

better air circulation between the fibers

sublimated color rendering

exceptional feeling of lightness

excellent elasticity

### BOXER COTTON

breathable and supple

great support

hypoallergenic

comfortable

# THE ECO-RESPONSIBLE TRUNK

## Certificates of production

### PROTECTING THE ENVIRONMENT AT THE HEART OF OUR STRATEGY

To engage in an approach in favor of the Environment is to have its ISO 14001: 2015 organization certified.

ISO 14001 version 2015 aims to provide organizations with a framework for protecting the environment and responding to new environmental conditions. It opens up throughout the organization and is part of a general approach to its performance.

The ISO 14001 version 2015 environmental management system emphasizes the role of management, its issues and the life cycle perspective of products and services. It offers a complete vision of the functioning of an organization, from the purchase of raw materials to the end-of-life treatment of products and services.

### QUALITY AT THE HEART OF OUR ISSUES

The quality standard ISO 9001 version 2015 defines the modalities to become a dynamic and alive organization, able to develop its activities.

In order to optimize our competitiveness and establish our place on the market, the "quality" experts from Bureau Veritas are there to certify our quality management system.

With ISO 9001: 2015 certification, we are able to guarantee internally and externally a reliable and controlled driving strategy.

### ETHICS IN THE HEART OF OUR CONDUCT

BSCI offers a code of conduct to businesses to support them in their efforts to build an ethical supply chain. This code of conduct is based on the most important international conventions on the protection of workers' rights and covers the following key concepts: social responsibility policies, freedom of association, working hours and overtime, non-discrimination, the prohibition of child labor and forced labor, the special protection of young workers, the payment of a minimum wage, measures to ensure health and safety in the workplace, the protection of the environment, and no precarious jobs.

### FAIRETRADE INTERNATIONAL

Its task is to monitor compliance with Fairtrade standards within producer organizations in so-called developing countries and to carry out independent certifications with all contractual partners.

### GOTS

The aim of this reference system is to define globally recognized requirements, guaranteeing the biological character of textiles from the harvest of raw materials, through socially and environmentally responsible manufacturing, to the production of raw materials. Labeling, in order to provide a reliable guarantee to the final consumer. Textile processors and manufacturers need to be able to export their organic fabrics and clothing with accepted certification in all major markets.

### OEKO-TEX

The OEKO-TEX® label alerts end-consumers to the added benefits of tested safety vis-à-vis skin-care clothing and other textile products. Thus, the label is an important decision aid when buying the textile product.
